Sage Estimating

Sage Estimating Report Manager

Sage Estimating Report Manager simplifies the task of reporting on estimates that you produce with your Estimating software.

For extensive analysis and reporting, you can easily export estimate data into a reportable file to use with SAP® Crystal Reports for Sage Estimating or Microsoft Access™. Select any estimate for reporting, combine estimate items, round item quantities, allocate add-ons, and more. The software provides sample SAP Crystal Report designs, including proposal templates and cross-tab reports, for professional looking presentations of estimate information. It's a simple way to organize and manage all estimating reports in one central location.

Features and Efficiencies

- Organize and manage estimating reports in one central location.

- View and report on estimate data through custom report designs created in SAP Crystal Reports for Sage Estimating or Microsoft Access.

- Extend your analysis and presentation capabilities using cross-tab reporting functionality in SAP Crystal Reports for Sage Estimating.

- Demonstrate professionalism with polished proposal templates.

- Includes a copy of compatible SAP Crystal Reports for Sage Estimating and ODBC software.

Benefits

Create more professional looking reports.

Generate estimating reports more quickly and easily using the reportable file in Sage Estimating.

Access data fast through custom report designs created in SAP Crystal Reports for Sage Estimating or Microsoft Access.

Decrease the learning curve often associated with complex reporting requirements.
