How it works

The Sage Education Alliance Program equips educators with recognized business software to use in their classroom—all at little or no cost.

What's included

Depending on the software you teach, packages typically include:

- Software licenses for classroom use
- Software licenses for student home use
- Software maintenance
- 24/7 online support
- Online training for instructors
- Discounts on certification packages
- An online community for students and instructors

Who's eligible

We invite all colleges, universities, technical schools, and professors to fill out an application and take advantage of this program. Once you're accepted, you'll receive information on how to access and use the software.

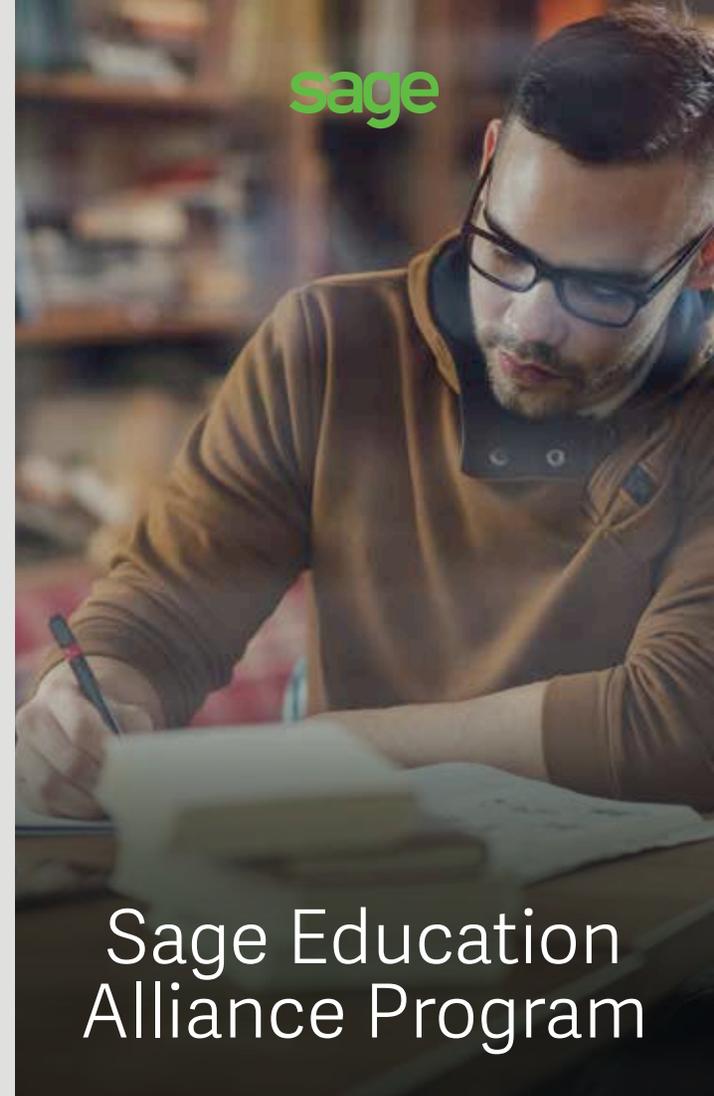

Sage Education Alliance Program

Sage Education Alliance Program

Give students real-world skills with innovative business software —at little or no cost.

The Sage Education Alliance Program: Bringing real business software to the classroom

Give your students the hands-on technology experience and certifications they need to get noticed in today's job market.

When you join the Sage Education Alliance program, you'll get the most progressive business software tools available for use in your classroom, and your students will be eligible for Sage certification at a reduced rate.

So whether you teach entrepreneurial business skills, business accounting and management proficiency, or construction management, you can equip your students with the skills they need to stand out from the crowd.

Solutions available for your classroom

Give your students the practical training and experience employers look for by bringing the right software into the classroom.

Sage One
Simple, online bookkeeping and business management software.

Sage 50 Accounting
Accounting software for small businesses, including receivables and payables (formerly Sage Peachtree in the U.S. and Sage Simply Accounting in Canada).

Sage Estimating
Automated estimating and bidding software designed specifically for the construction industry (formerly Sage Timberline Estimating).

Sage 100 Contractor
Financial and operations management software for contractors in construction and service-related businesses (formerly Sage Master Builder).

Sage 300
Comprehensive financial, operations, and inventory management software in multiple languages and currencies (formerly Sage Accpac).

Give your students the competitive edge employers look for—experience.
